**Notes**

- This map showing the 1% AEP (1 in 100 year) flood extent, is based on the modelled results from the report *Alice Springs Flood Investigation and Floodplain Mapping Study, Report No. 0269-02-C1 October 2015*, by WRM Water & Environment Pty Ltd
- The flood model is based on Alice Springs town and rural development as of 2010
- Floodway area is defined as the area where the velocity x water depth exceeds 1
- Floodway is defined as the area where the depth of floodwater exceeds 2.0 metres
- A 1% AEP flood (often referred to as the Q<sub>100</sub>) is defined as a flood which has a 1 in 100 chance of being equalled or exceeded in any one year
- This map is intended to be used at a scale of 1:10,000 and any enlargement beyond this scale does not increase the accuracy of the data appearing on the map and is not recommended
- An accurate flood extent at any location can only be obtained by a survey traverse from a known location

**Legend**

- Flood extent (fringe)  
Depth 0.0 - 0.15 metres
- Flood extent  
Depth 0.15 - 2.0 metres
- Floodway area  
Depth x Velocity > 1
- Floodway  
Depth > 2.0 metres
- 575 Peak flood surface contour  
metres AHD (Interval = 0.25)
- River channel, flow direction
- Limit of flood mapping
- Property boundaries (Oct. 2015)
- Road centrelines
- Bridge, causeway
- Railway
- Park or Reserve boundary
- Relief
