**Artworks by the Ti Tree School
Indigenous Language and Culture
Students and their teacher April
Campbell.**

Supported by a NT Waterwise Schools Grant 2009,
Department of Natural Resources, Environment, the
Arts and Sport.

Where does
the water
come from ?

Before it rains a lot the clouds turn black and sometimes there is lightening.
When it is cold, there can be hail.
When it rains the termites start to busily build their nests.

What is
the water
good for ?

We have lots of fun when there is water to swim in.

We need water in the house for showers and drinking and to wash our clothes.
We like having water to keep the lawn green and water the flowers.

After it has rained the frogs come out and make lots of noise.

Sometimes you can see the kangaroos have a drink from the waterhole when it is full.

And the rain can make some of the plants flower.

How can
we help
save water ?

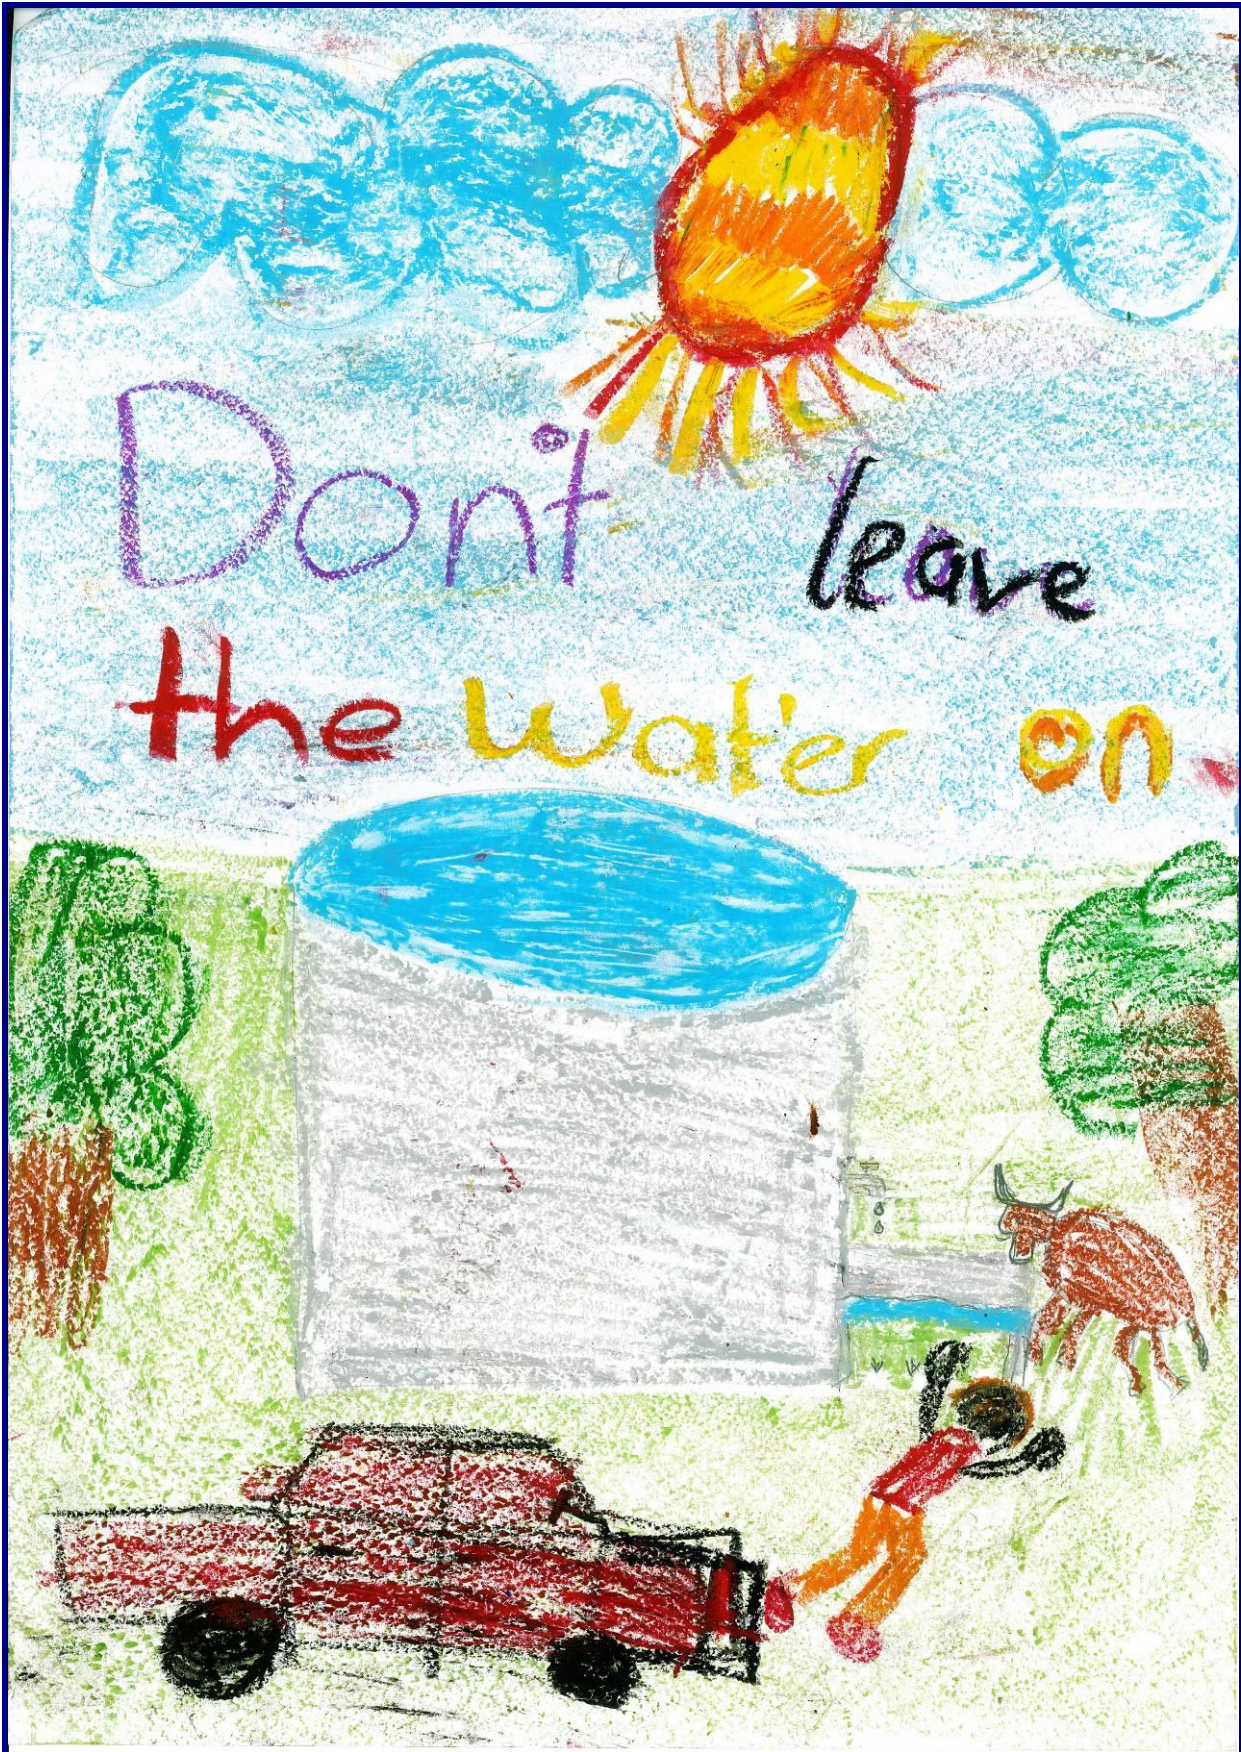

When the tank is overflowing we should tell someone to turn off the pump.
